Palm Derivatives in the Home and Personal Care Value Chain

Harald Sauthoff, BASF Personal Care and Nutrition GmbH

Monheim, Germany

The RSPO can reflect on a lot of progressive achievements and has worked it's way through a lot of constraints to implement the use of sustainable palm products in many markets. Nevertheless, there are still market segments of importance, where there is a lot to do. The complexity of the Home and Personal Care product value chain has been leaving a lot of question marks on the table on it's path to physical transition. Now it's time to address these issues and work towards further achievements on the route to more sustainable oil palm products in consumer products! What's the complexity and why is it difficult to transform these value chain into more sustainability? I will try to answer.
